# ABOUT US

The HOPE FOR NIGERIA is a leadership based progressive driven initiative to provide high-quality and timely research, analysis, advice, and advocacy on public issues including the rule of law and democratization, public and corporate governance, legislation, justice, and human rights, conflict prevention and resolution, institution reforms, poverty reduction, and corruption. It is set up to provide and foster strategies and bring together public leaders to shape public policies, legislation, and governance machinery for the public's greater good. We wholeheartedly embrace the policies of the Federal Government of Nigeria towards development, resource management, and distribution.

We aim at promoting public and private sector policy delivery and improvements, while we use our productive and well-structured module to improve the lives of Nigerians and channel our activities towards policies that work for the common good of the public. To provide an environment to help the common man to strive in a society that is being developed gradually. These solutions have been geared towards giving our little financial resources to the masses and also encouraging, training, and developing the minds of individuals towards togetherness and actualization of our dreams as a Nation.

In addition to all of the above, we seek to organize and run centers for: Youth Development through skill acquisition; farms; factories; research centers; and market-places, and provide a structure for Enterprise Innovation and Development.
